

Employee Choice and Self Registration Option

Today, most important notifications come to you on your work email.

Do you want to register?
Each employee can choose to keep notifications as is or specify how they would like to be notified about emergencies and other important events.

No thanks.

Choice 1: Take no action. Keep everything the same.

Work Email

Choice 2: Register with AlertsMA. Specify how you want to be contacted.

Personal Text	Personal Email	Home Phone	AlertsMA App	Work Email	Work Phone
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

AlertsMA is a new Commonwealth tool that will allow agencies to communicate with their workforces in real-time about important alerts and emergency notifications. If there is a water main break or if access to the building is closed, the AlertsMA tool will allow administrators to message those affected – and only those affected – via the communications channels each employee personally prefers (phone, email, text, or app on their work or personal devices).

If an employee wants notification of snow closures and other alerts to be texted to their personal phone, they just complete the short registration process online and indicate how they would like to be contacted. If an employee opts to not register, they will get messages as they currently do, largely to their work email. *Each employee can make their own choices. Each employee can change their preferences whenever they want.*

It's your choice.
